Bob,  
Yes, the Army wanted to discontinue the groundwater monitoring based on the levels, and EPA agreed. However the ROD needed to be supplemented to do so. Therefore, we continued the groundwater monitoring until we can accomplish that.

It has simply been a low priority.

My primary office phone number is now: 347-213-1565

Subject: [Non-DoD Source] Seneca SEAD 25 Annual LTM Report for 2018

Randy,

EPA is in receipt of the above document. However, I am confused. There are internal emails regarding the 2017 LTM Report which indicated that the Army wanted to discontinue groundwater monitoring and an email from EPA to you regarding it sent back in September 2018. The Army cover letter for the 2018 LTM Report does not discuss discontinuing groundwater monitoring. Am I confused or has the Army decided to continue GW monitoring at SEAD 25? Please let me know. Thanks.

Bob
